After evaluating various Classification algorithms, I have decided to finalize the Support vector classification model as it consistently demonstrates higher accuracy and superior performance compared to others.

## Classification Report for Training Data:

precision	recall	f1-score	support	
0.0	0.94	0.99	0.96	7120
1.0	0.91	0.64	0.75	1237
